

Education

B.Tech Computer Science Engineering Guru Gobind Singh Indraprastha University : 9.2 CGPA Coursework: Data structure and algorithm, OOPs, DBMS, Operating system, Computer Networks	2024
Intermediate Panchsheel Public School, Delhi : 92% Subject: PCM + Computer Science	2019

Skills

Technical Skills	HTML5, CSS3, JavaScript,Typescript, ReactJS, NodeJS, ExpressJS, NextJS, NestJS, Java, Spring Boot, MCP and Agentic Programming, Tailwind CSS, REST API, Postman, (Source Control)Git, Gitlab, Web Components, WebSocket, Microservices, DNS, Distributed Systems, CI/CD, SQL Management Studio, MongoDB, MySQL, PostgreSQL,Redis, Docker, Cloud platforms (AWS/Azure/GCP), Linux, Unit Testing, Agile/Scrum, Data Structure and Algorithms, Claude-code
Soft Skills	Punctual, Leadership, Team Management, Communication Skill

Experience

FULLSTACK DEVELOPER UXMagic.AI , Bangalore, India	June 2025 - Current
---	---------------------

- Embedded Multi-agent systems** and **orchestration** of LLM-enabled actions to build a **AI-powered design assistant** for UXMagic.AI, along with **(RAG)** optimisations and hybrid search techniques.
- Designed and architected enterprise-scale**, content-heavy frontend experiences including **Inspirations, React & Figma libraries, community pages, and content pages**, supporting **10+ product discovery pages** through scalable, reusable UI components.
- Developed and delivered backend APIs** to enable sectional editing within design frames, and **prompt-engineered LLM workflows** to align outputs with user-defined guidelines, resulting in a **35% increase in feature adoption**.
- Improved page load performance and perceived responsiveness** by **~20–30%** on newly launched marketing/product pages by structuring layouts for lazy loading, incremental rendering, and efficient asset usage.
- Reduced export-related user errors** by **~25%** by fixing React export flow bugs, improving reliability of a core workflow used by active product users.
- Improved SEO crawl coverage** to **~100% for newly launched pages** by fixing robots.txt and sitemap configuration issues, enabling correct indexing of comparison and marketing content.
- Contributed features within a frontend-monolithic architecture**, optimizing component reuse and bundle boundaries to support **ongoing feature velocity** without regressions.

SOFTWARE ENGINEER Grapecity India (Developer Tool Division), Noida, India	Jan 2024 - May 2025
---	---------------------

- Developed and delievered tailored **software components extensions**, offering enhanced and efficient solutions for developers, resulting in improved user experience for their end customers.
- Designed **highly customizable and scalable enterprise-grade JavaScript solutions, focusing on client-side Excel functionality**.
- Worked on **SpreadJS**, a leading **JavaScript-based spreadsheet** solution, to optimize performance in complex web-based environments.
- Delivered **CRM system enhancements**, improving customer experience and streamlining client-side processes.
- Key technologies used: **JavaScript (ES6+), TypeScript, ReactJS, NodeJS, C#, GitLab, Visual Studio, postgresSQL, mySQL and Webpack module Bundlers**.

SOFTWARE ENGINEERING INTERN MICROSOFT INDIA, Hyderabad, India	Apr 2023 - June 2023
---	----------------------

- Worked on the **Azure DevOps Test Plans Team**, providing solutions to enhance **test case import/export** functionality, significantly reducing file size by up to **500 KB**
- Developed unit tests and explored multiple **npm packages** to optimize feature implementation
- Collaborated with cross-geographic teams to implement **micro-frontends**, features, and workflows, while following **Agile methodologies**.
- Gained expertise in **C#, SQL Management Studio, MySQL**, and **telemetry tools**.

Projects

- Medico** ([link](#))
 - Developing a **real-time healthcare communication platform** enabling seamless interaction between patients and doctors through WebSocket-based chat.
 - Built a **scalable frontend** using Next.js, React, TypeScript, and Tailwind CSS with Zustand for efficient state management.
 - Implemented **JWT-based authentication** with protected routes, secure login, and role-based access (Patient/Doctor).
 - Designed and integrated **real-time chat features** including room-based messaging, typing indicators, connection status, and message history.
 - Developed a **NestJS backend** with WebSocket Gateway for real-time communication and REST APIs for core functionalities.
 - Integrated **MongoDB with Mongoose** for efficient data modeling, storage of users, messages, and chat rooms.
- NeuraNotes-AI Based Notes Application** ([link](#))
 - Built a full-stack notes application using **React, Node.js, Express.js, and MongoDB** with complete CRUD functionality.
 - Implemented a **drag-and-drop note canvas** using `react-rnd` for flexible note organization.
 - Integrated **AI-powered features** via OpenRouter API to improve grammar, summarize, and expand notes.
 - Enabled **persistent data storage** using MongoDB and Mongoose for reliable note management.
 - Managed global state using **React Context API** for scalable and consistent state handling.
 - Developed a responsive UI with React Router and Axios for seamless navigation and API communication.

Profiles

Solved 300+ Data Structure And Algorithm problems on [Leetcode](#)
Maximum rating 917 on [Codeforces](#)
Selected from the pool of 50000+ students for internship in microsoft via Microsoft Engage Program.
